

AUTISM AND ABA SERVICES

We recognize and celebrate individuality while focusing on strengths to teach new skills and improve quality of life for the individuals we serve.

Solutions for your family

We support autistic individuals of all ages in growing their communication skills, promoting autonomy and developing relationships within their communities. Our clinicians combine a strengths-based focus along with Applied Behavior Analysis (ABA), which is an approach built on the scientific understanding of behavior.

Our team of Board Certified Behavior Analysts (BCBAs) and Behavior Technicians are trained to deliver comprehensive and focused treatment. Our approach is designed with evidence-based practice, flexibility, compassion and cultural humility. We can't wait to partner with your family to develop meaningful support systems for your child!

Accepting and Promoting Individuality

No two brains are wired the same. We focus on your child's unique strengths and preferences to help them:

- ▶ Grow their communication skills
- ▶ Regulate their emotions effectively and safely
- ▶ Advocate for their needs and preferences
- ▶ Complete tasks with autonomy
- ▶ Embrace their uniqueness
- ▶ Reach for the stars!
